FYP/FYT

2025-2026 (?fyp_year=2025-2026)

Date	Event	Notes
2026-04-01 (Wednesday), 6-7pm	Information Seminar	Attend 2026-27 FYP/FYT Information Seminar scheduled to be held on 1 April 2026 (Wednesday), 6-7pm in LTA. The seminar covers policy, timeline, requirements and grading of FYP/FYT. Check out Group Mates Finders if you are looking for group mates for your CSE FYP.
2026-04-25 (Saturday), 0:01am	Project Descriptions Released to Students	Sign into the FYP Management System for the details of the project/thesis descriptions. Check out Before Starting and Getting Started with Your FYP, prepared by the communication tutors. Get familiar with the Computing Facilities for FYP.
2026-05-01 (Friday), 0:01am	Project Registration Opens / Bidding and Committing Period Begins	Choose a project/thesis by registering online. Note that you are committed to an FYP/FYT once your request is accepted. The earlier you make the commitment between you and the project advisor, the better your chances are of getting your favorable project. You may check FAQ for details.
2026-09-11 (Friday), 11:59pm	Proposal Report Due	Read the detailed instructions for your report carefully. Attend Library workshops to learn how to use library and Internet resources. Meet the communication tutors and meet their deadline to improve your English. Submit your reports via the FYP Management System. The penalty for late submission is 5% per day. You are encouraged to upload your photos to the FYPMS so that the second reader can match your face with your name.
2026-09-25 (Friday)	Proposal Report Graded	Check your grade and comments from your advisor & reader when you sign into the FYP Management System from September 26, 2026 onwards.
2026-10-16 (Friday), 11:59pm	Individual Ethics Essay Due	Download Essay Template. Check out Individual Ethics Essay, prepared by the communication tutors. Submit your essay via the FYP Management System. The penalty for late submission is 5% per day.
2026-10-31 (Saturday), 11:59pm	Monthly Report for October Due	Download Monthly Report Template (.docx). Submit your monthly report via the FYP Management System.

Date	Event	Notes
2026-11-30 (Monday), 11:59pm	Monthly Report for November Due	Download Monthly Report Template (.docx). Submit your monthly report via the FYP Management System.
2027-01-15 (Friday), 11:59pm	Monthly Report for December/January Due	Download Monthly Report Template (.docx). Submit your monthly report via the FYP Management System.
2027-02-12 (Friday), 11:59pm	Progress Report Due	Read the detailed instructions for your report carefully. Meet the communication tutors and meet their deadline to improve your English. Submit your report via the FYP Management System. The penalty for late submission is 5% per day.
2027-02-28 (Sunday)	Progress Report Graded	Check your grade and comments from your advisor & reader when you sign into the FYP Management System from March 1, 2027 onwards.
2027-04-08 (Thursday)	Oral Presentation Schedule Released	FYP oral presentation schedule will be announced. FYT oral defenses should be scheduled individually by the advisor and reader.
2027-04-09 (Friday)	Request Demo Equipment from CS System	Request special demo machines or equipment. Should you need to borrow demo machines or equipment, please send an email to CS System (cssystem@cse.ust.hk) to check the stock and schedule a time slot for collection.
2027-04-16 (Friday), 11:59pm	Final Report & Self-Assessment Report Due	Read the detailed instructions for your report carefully. Meet the communication tutors and meet their deadline to improve your English, also check out their advice on writing Final Report and Self-Assessment Report. Download Self-Assessment Report Template (.docx). Submit your reports via the FYP Management System. The penalty for late submission is 5% per day.
2027-04-22 (Thursday), 11:59pm	Program Code Due	Upload your program code to CSE Linux Workstations via SSH: 1. Connect to any of the host names <code>cs12wk01.cse.ust.hk</code>, ..., <code>cs12wk52.cse.ust.hk</code> with your CSE UNIX account 2. Change remote directory to <code>/csproject/fyp26upload/<project_code></code> (mounted on demand) * Input <code>/csproject/fyp26upload</code> directly even though you do not see any sub-directory under <code>/csproject</code> ** <code><project_code></code> is in lowercase, e.g. <code>/csproject/fyp26upload/ar2</code> 3. Copy your files to the remote directory Contact cssystem@cse.ust.hk if you have any problems in uploading files.

Date	Event	Notes
2027-04-24 (Saturday) to 2027-05-01 (Saturday)	Oral Presentation & Demo	FYP oral presentation will be scheduled to be held on two Saturdays (April 24 and May 1, 2027). The schedule will be announced in the early April. All presentations will be video recorded. Each project group has 40 minutes, including Q&A. Overrun is not normally allowed. Read Advice on Oral Presentation, from the communication tutors. * Few presentation sessions may be scheduled during the weekdays in late April and early May due to the availabilities of faculty members. Students are recommended to reserve time to do presentation during late April and early May, 2027.
2027-05-06 (Thursday), 11:59pm	Video Trailer Due	Submit your 3-minute video in MP4 format (playable in a web browser) via the FYP Management System. The penalty for late submission is 5% per day. The video should begin with the <u>project/thesis title and code</u>, the <u>names of the group members</u>, and the <u>names of the supervisors</u>. Note that the 2nd second of the video would be <u>captured</u> to be the thumbnail in the gallery.
2027-05-08 (Saturday)	Final Report & Oral Presentation Graded	Check your grade and comments from your advisor & reader when you sign into the FYP Management System from May 9, 2027 onwards.
2027-05-10 (Monday) to 2027-05-14 (Friday)	Video Trailer Online	FYP/FYT video trailer will be displayed online for the public to view, as well as second readers to view and grade. See Poster / Video Trailer Gallery.
2027-05-15 (Saturday)	Video Trailer Graded	Check your grade and comments from your reader when you sign into the FYP Management System from May 16, 2027 onwards.
	Best FYP Award	Also considered for nominations to external competitions! See the list of Distinguished FYPs.

Intended Learning Outcomes (ILOs)

COMP4981

The objectives of this course are to:

1. Provide an opportunity for the student to apply and integrate the knowledge acquired throughout his/her undergraduate study.
2. Develop the capabilities of a student in analyzing and solving complex and possibly real-case problems.
3. Develop a student's skills in the systematic development, documentation and presentation of a significant piece of work.

On successful completion of this course, students are expected to be able to:

1. Develop original solutions to computer science engineering problems of significant complexity.
2. Utilize prior knowledge, independent research, published information, and original ideas in addressing problems and generating solutions.
3. Critically evaluate different design concepts, and justify the final choice of design through engineering analysis.
4. Use software engineering tools to plan, design, implement, validate and maintain a project.
5. Prepare and deliver a well structured written analysis of a project, as well as an oral presentation.
6. Establish relationships and implement practices with team members and advisors that will underpin a high level of performance and encourage continuous improvement.

COMP4981H

The objectives of this course are to:

1. Provide an opportunity for the student to apply and integrate the knowledge acquired throughout his/her undergraduate study.
2. Develop the capabilities of a student in analyzing and solving complex and possibly real-case problems.
3. Develop a student's skills in the systematic development, documentation and presentation of a significant piece of work.

On successful completion of this course, students are expected to be able to:

1. Develop original solutions to computer science engineering problems of significant complexity.
2. Utilize prior knowledge, independent research, published information, and original ideas in addressing problems and generating solutions.
3. Critically evaluate different research approaches, and justify the final choice of design through system development, simulation and/or analysis.
4. Use computational and/or mathematical tools to plan, design and validate an approach if needed.
5. Prepare and deliver a well-structured written analysis of the project, as well as an oral defense.
6. Establish relationships and implement practices with advisors and/or local/international researchers that will underpin a high level of performance and encourage continuous improvement.

The FYP/FYT Coordinator

- Dr. Xiaojuan MA (mxj@cse.ust.hk)
