INTERNSHIP PROGRAMS

What are Internships? And why are they important?

Internship is a great way for you to gain work experience, try out a new and get a head start in your job search after graduation! It is definitely while you are at HKUST.

Type of Internships

Internships can be paid or unpaid and may take various forms:

- part-time during the term;
- full-time during the term (in which case you would apply for study leave)
- full-time during a winter or summer break.

Internship Opportunities

Most internships are offered directly from individual employers ; these "direct-hire" internship opportunities targeting HKUST students are exclusive [Job Board](#). Check them out! In addition, [JIIIS](#) is also a great resource for all university students in Hong Kong)

Meanwhile, there are also other program-based internships, organized by HKUST. These internship programs cover local, Chinese and overseas opportunities. These opportunities offer a unique opportunity for you to gain work experience of Hong Kong, as well as experience in a new field which you cannot get through "direct-hire". Highly recommended especially for our year 1 students! Check them out below!
